

LATEX PRACTICE

RAUL VILLALOBOS

$$2x + 7 - x = 4x + 2b - 3x - 3b$$

Let x be 1

$$(2(1) + 7 - 1) - 3 = 4(1) + 2b - 3(1) - 3b$$

$$(2 + 7 - 1) - 3 = 4 - b - 3$$

$$5 = 1 - b$$

$$b = -4$$
