RAUL VILLALOBOS

Math AoPS

$$2x - 3y = -5$$

$$5x - 2y = 4$$

$$-5x + 2y = -4$$

$$3x + y = 9$$

$$y = -3x + 9$$

$$2x - 3(-3x + 9) = -5$$

$$2x + 9x - 27 = -5 ; 11x = 22$$

$$x = 2$$

$$y = -3(2) + 9 = -6 + 9 = 3$$

$$(2, 3)$$
