RAUL VILLALOBOS

Math AoPS
6.1.3)
 $a_{dc} = 68 \text{ mi}^2$
 $p_{dc} = 570,000 \text{ people}$

Find people per mi^2

$$\frac{570,000 \text{ people}}{68 \text{ mi}^2} = \frac{\text{people}}{\text{mi}^2}$$
